Revenue OS

SIGNALLOOP ECRM

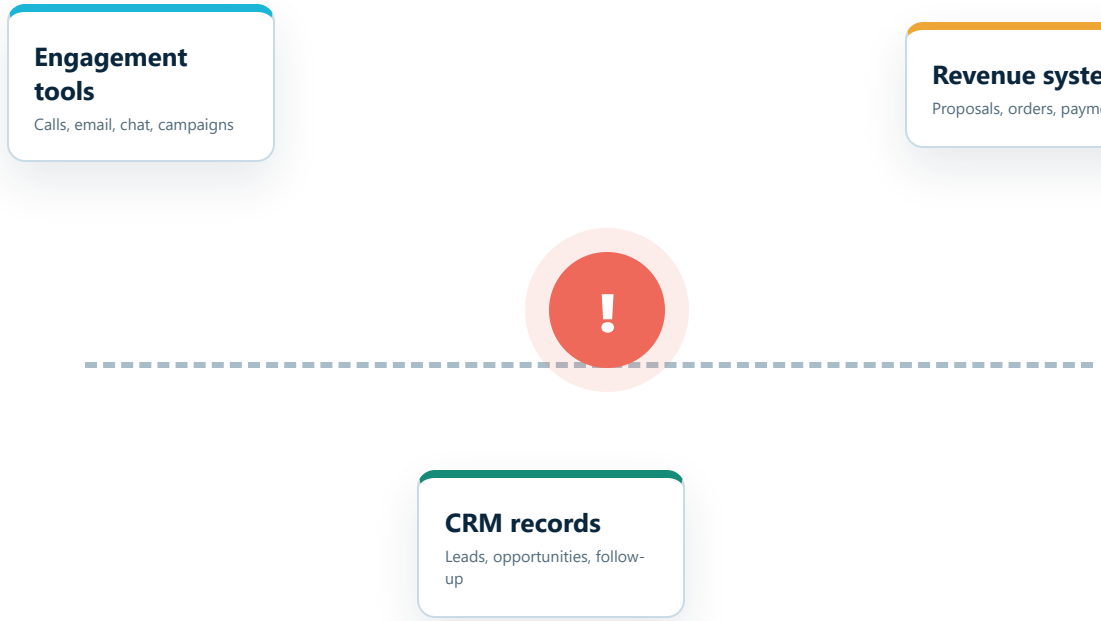

AUTONOMOUS PROSPECTING & GOVERNED REVENUE EXECUTION

Turn every market signal into accountable revenue.

Revenue OS connects AI lead discovery and autonomous commercial agents in SignalLoop to lead-to-cash execution in eCRM.

Discover & Engage	Decide	Close	Prove
AI waterfall, voice, email	Policy and next action	Proposal and order	Outcome and audit

The customer journey crosses systems. Accountability disappears between them.

01

Activity without outcome

Touches are visible. Their effect on pipeline and cash is not.

02

Automation without control

AI work can outrun consent, approval, budget, and brand policy.

03

Handoffs without evidence

Context is re-keyed, ownership blurs, and audit trails break.

Revenue OS

Revenue OS is the umbrella. Each product stays excellent at what it owns.

ENGAGEMENT & AGENT EXECUTION

01

SignalLoop

Discovers prospects, enriches intent, and executes governed outreach.

- AI Lead Discovery & Waterfall
- Voice, email, and sequences
- Autonomous commercial agents

OPERATING BRAIN

02

Revenue OS

Applies evidence, policy, scoring, decisions, and attribution.

- Next-best action
- Approvals and autonomy
- Outcome ledger

LEAD-TO-CASH EXECUTION

03

eCRM

Converts qualified intent into commercial records, delivery, and cash.

- Pipeline and proposals
- Orders and production
- Finance and reporting

Revenue OS

Not another activity dashboard. An evidence chain from agent action to cash.

SIGNAL
Buyer intent

>

ACTION
Human or AI work

>

DECISION
Policy and approval

>

MILESTONE
Proposal or order

>

OUTCOME
Revenue and cash

Who acted? Why? What changed?

Revenue OS keeps enough context to answer those questions across product boundaries.

Evidence snapshot
Context at decision time

Policy version
Rules that allowed work

Actor identity
Human, agent, or system

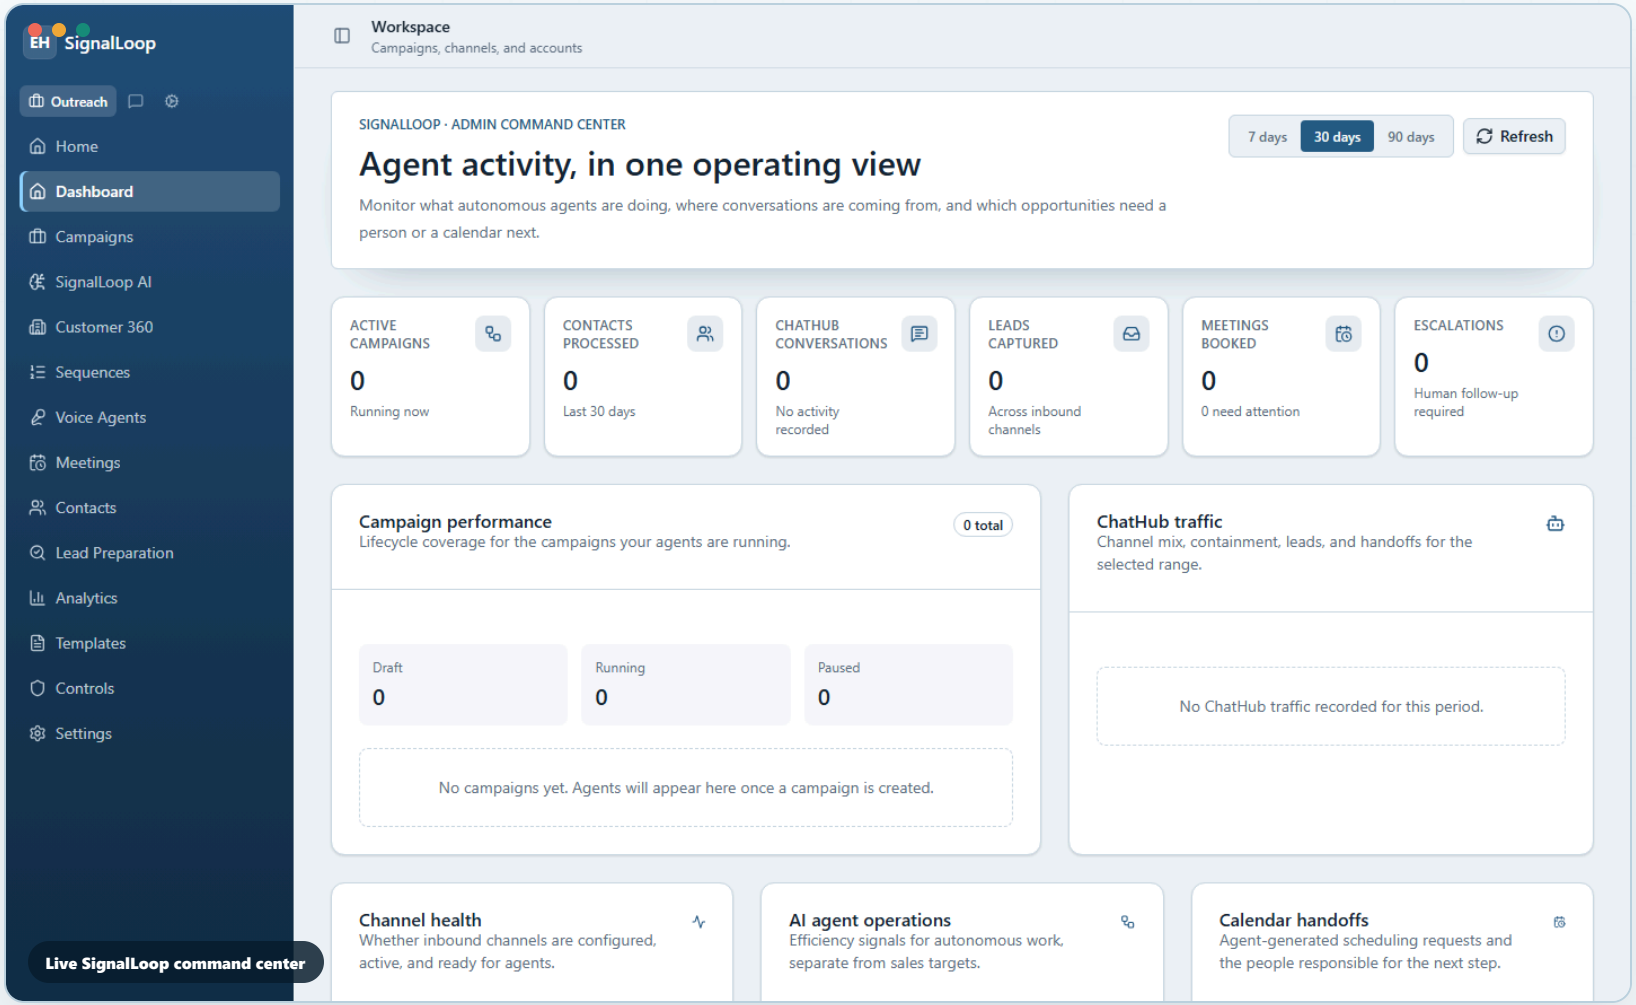

Correlation trail
One journey across events

Cost visibility
Effort beside outcome

Revenue milestone
Qualified to collected

Revenue OS

Run engagement from one governed command center.

Prospect with intelligence

Filter by ICP, enrich via waterfall (Apollo, Clay, Burkettopti), and score on 4 pillars.

Autonomous agent suite

Lead prep, outreach, calendar booking, and proposals running in governed slots.

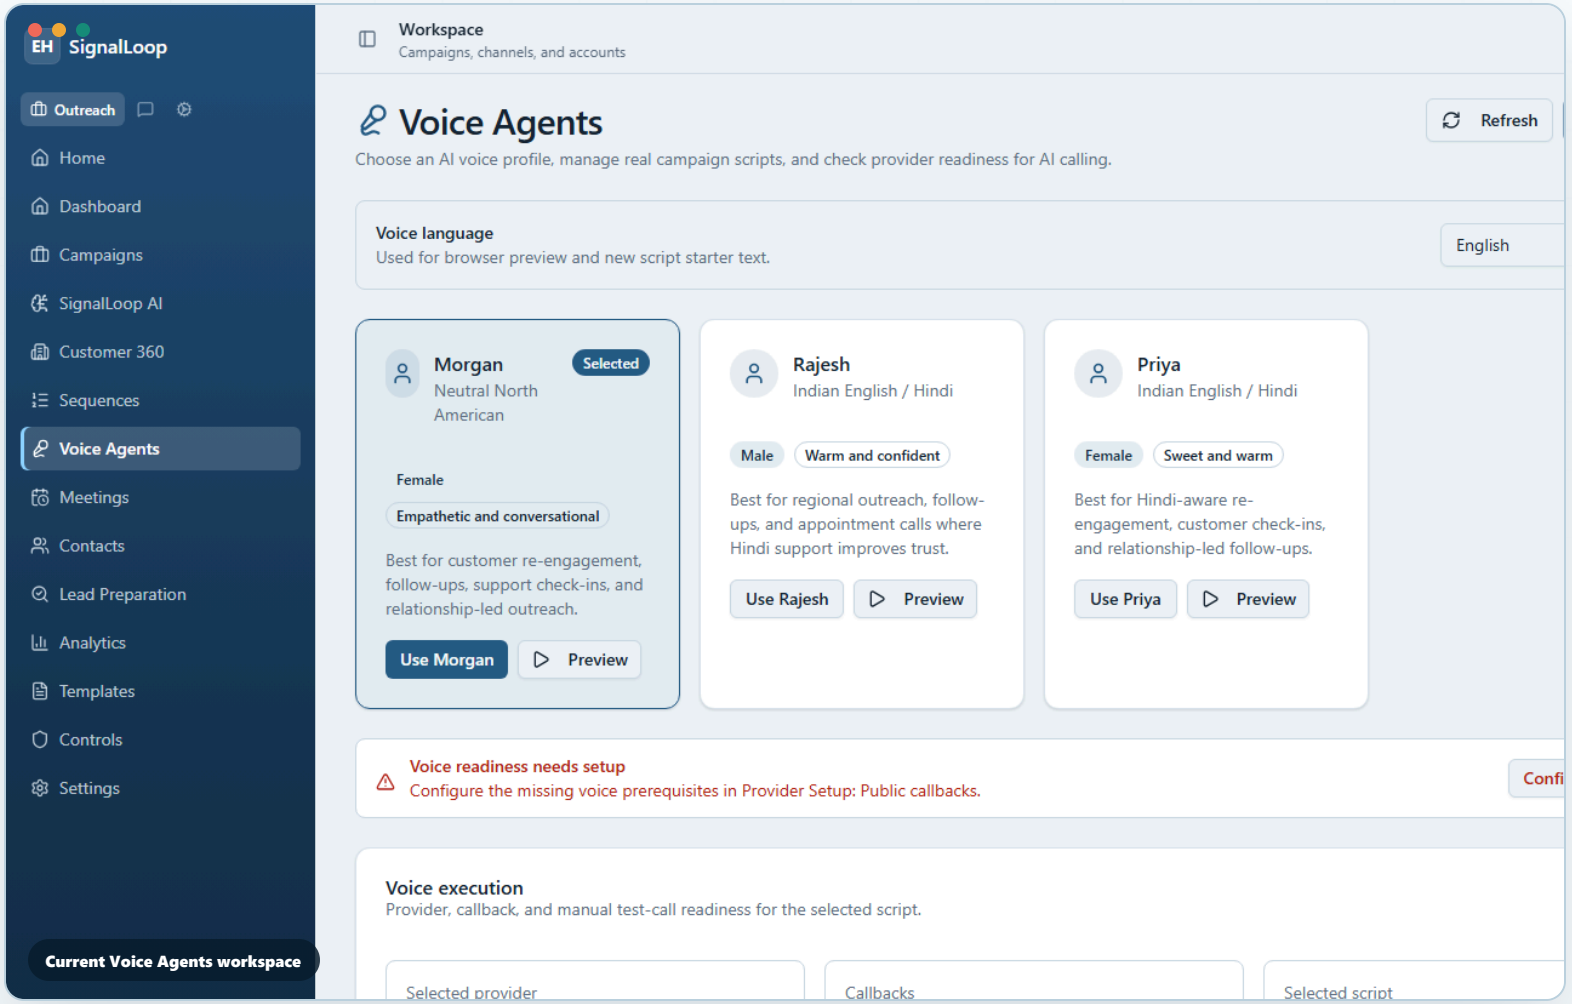

Keep humans in control

Review gates for generative proposals and emergency kill-switches.

Know what is ready

Read channel, agent, provider, and scheduling state.

Deploy task-specific commercial agents with strict slot governance and durable recovery.

Lead Discovery & Prep

Waterfall enrichment, scoring policies, and opportunity briefs.

Voice & Email Outreach

Voice profiles, script compliance, and multi-touch sequences.

Governed Proposals

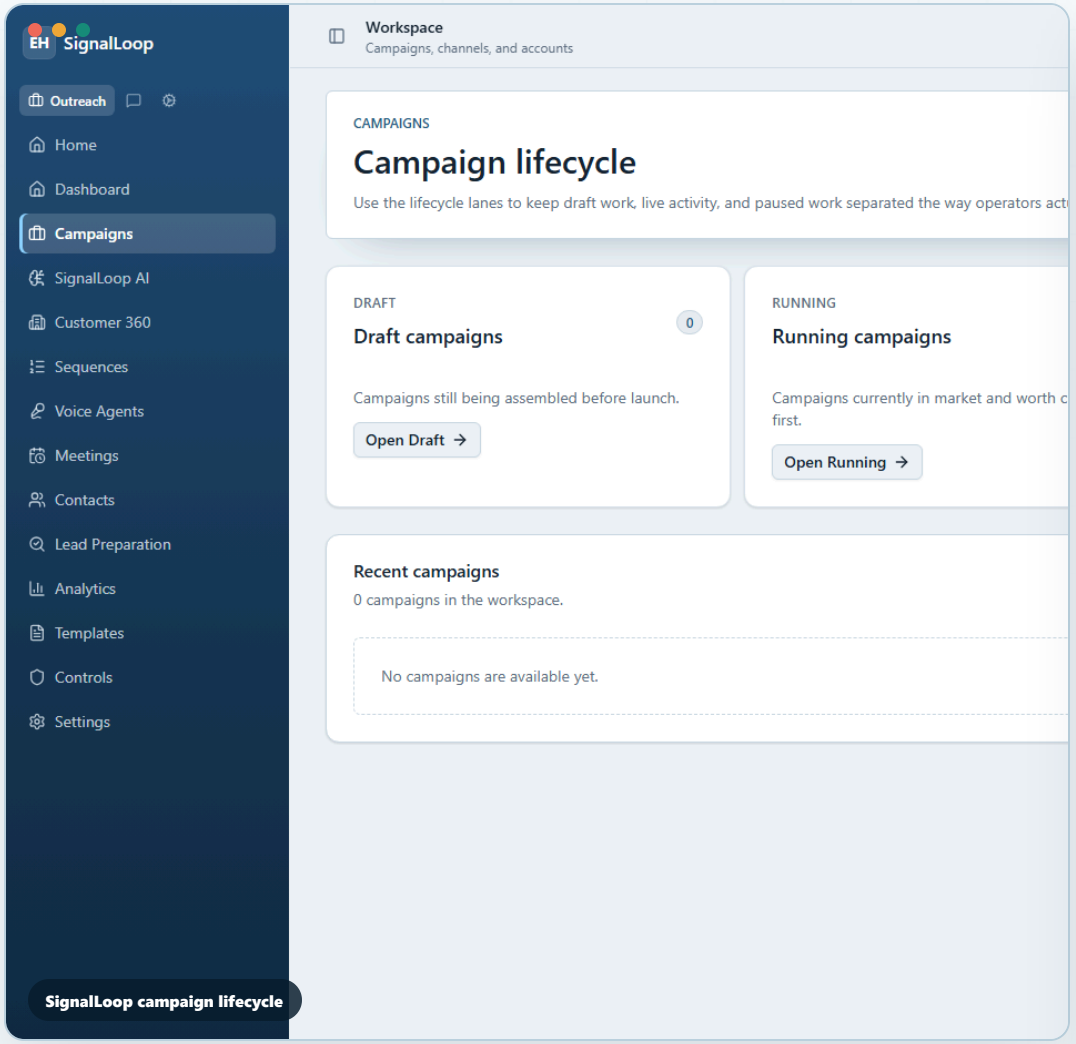

Grounded pricing, line items, and approval gates.

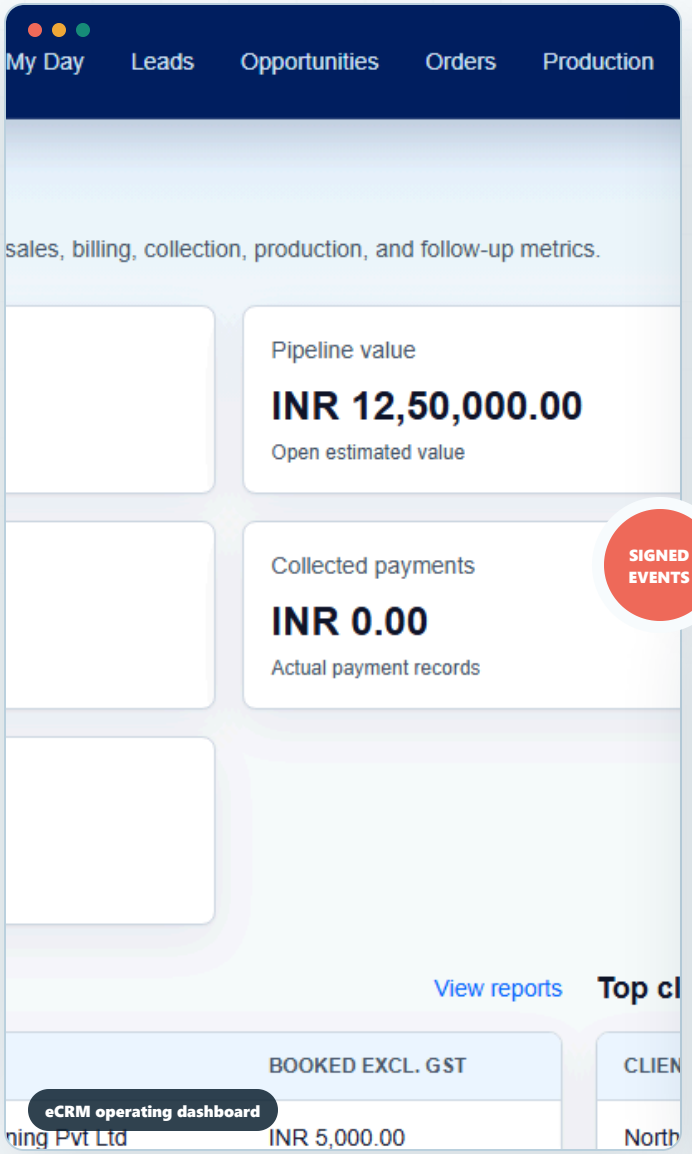

Calendar Scheduling

Durable meeting calculation and immutable booking receipts.

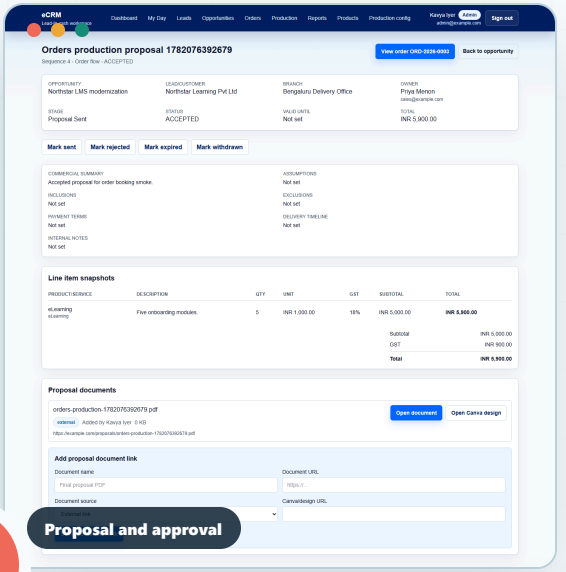

Revenue OS

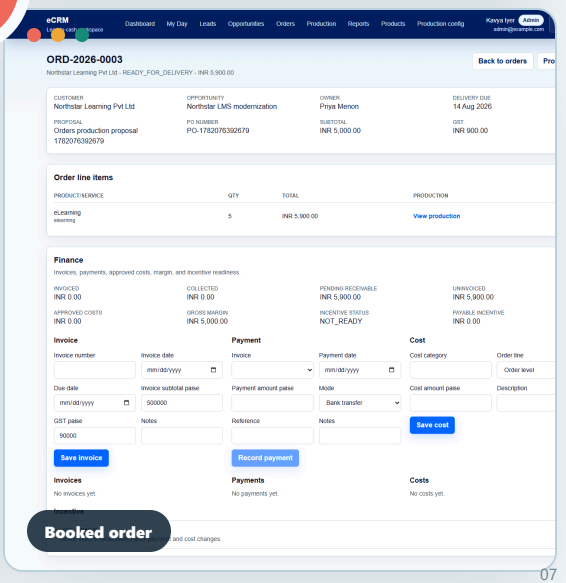

Context crosses the boundary. Product ownership stays clean.

SIGNED EVENTS

SIGNALLOOP OWNS
Conversation and execution

REVENUE OS CARRIES
Evidence and decisions

ECRM OWNS
Commercial record and cash

Revenue OS

Scale agentic revenue work without surrendering policy, identity, or auditability.

Identity

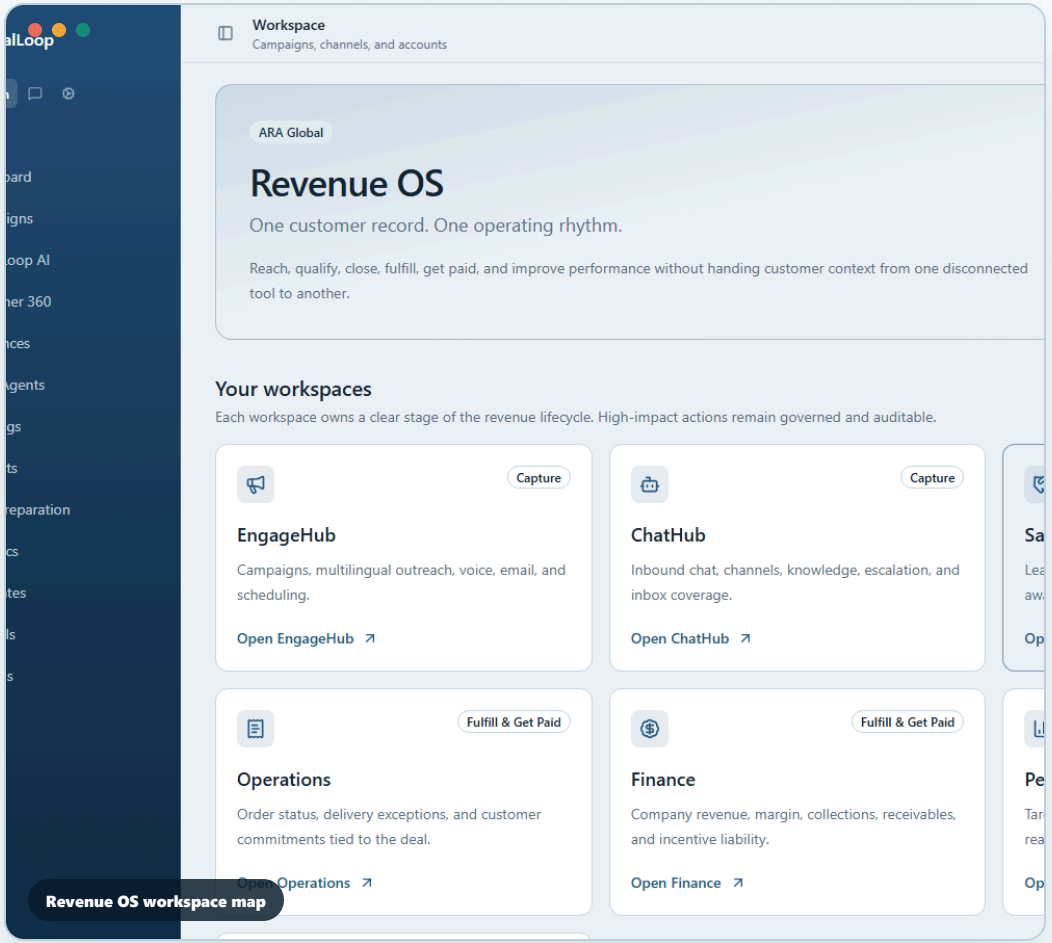

Roles and workload claims

Policy

Consent, budget, autonomy

Governed execution

One tenant-scoped evidence trail

Revenue OS workspace map

Tenant isolation

Events and records stay in customer scope.

Independent products

SignalLoop and eCRM sell separately.

A connected operating rhythm for growth, control, and customer continuity.

REVENUE LEADERSHIP

See what creates revenue

Channel activity →	Outcome evidence
Pipeline guesses →	Traceable milestones

A clearer view from intent to order to cash.

OPERATIONS AND SALES

Move work with context

Manual re-entry →	Event handoff
Scattered queues →	Next valid action

Fewer blind spots between engagement and execution.

RISK AND TECHNOLOGY

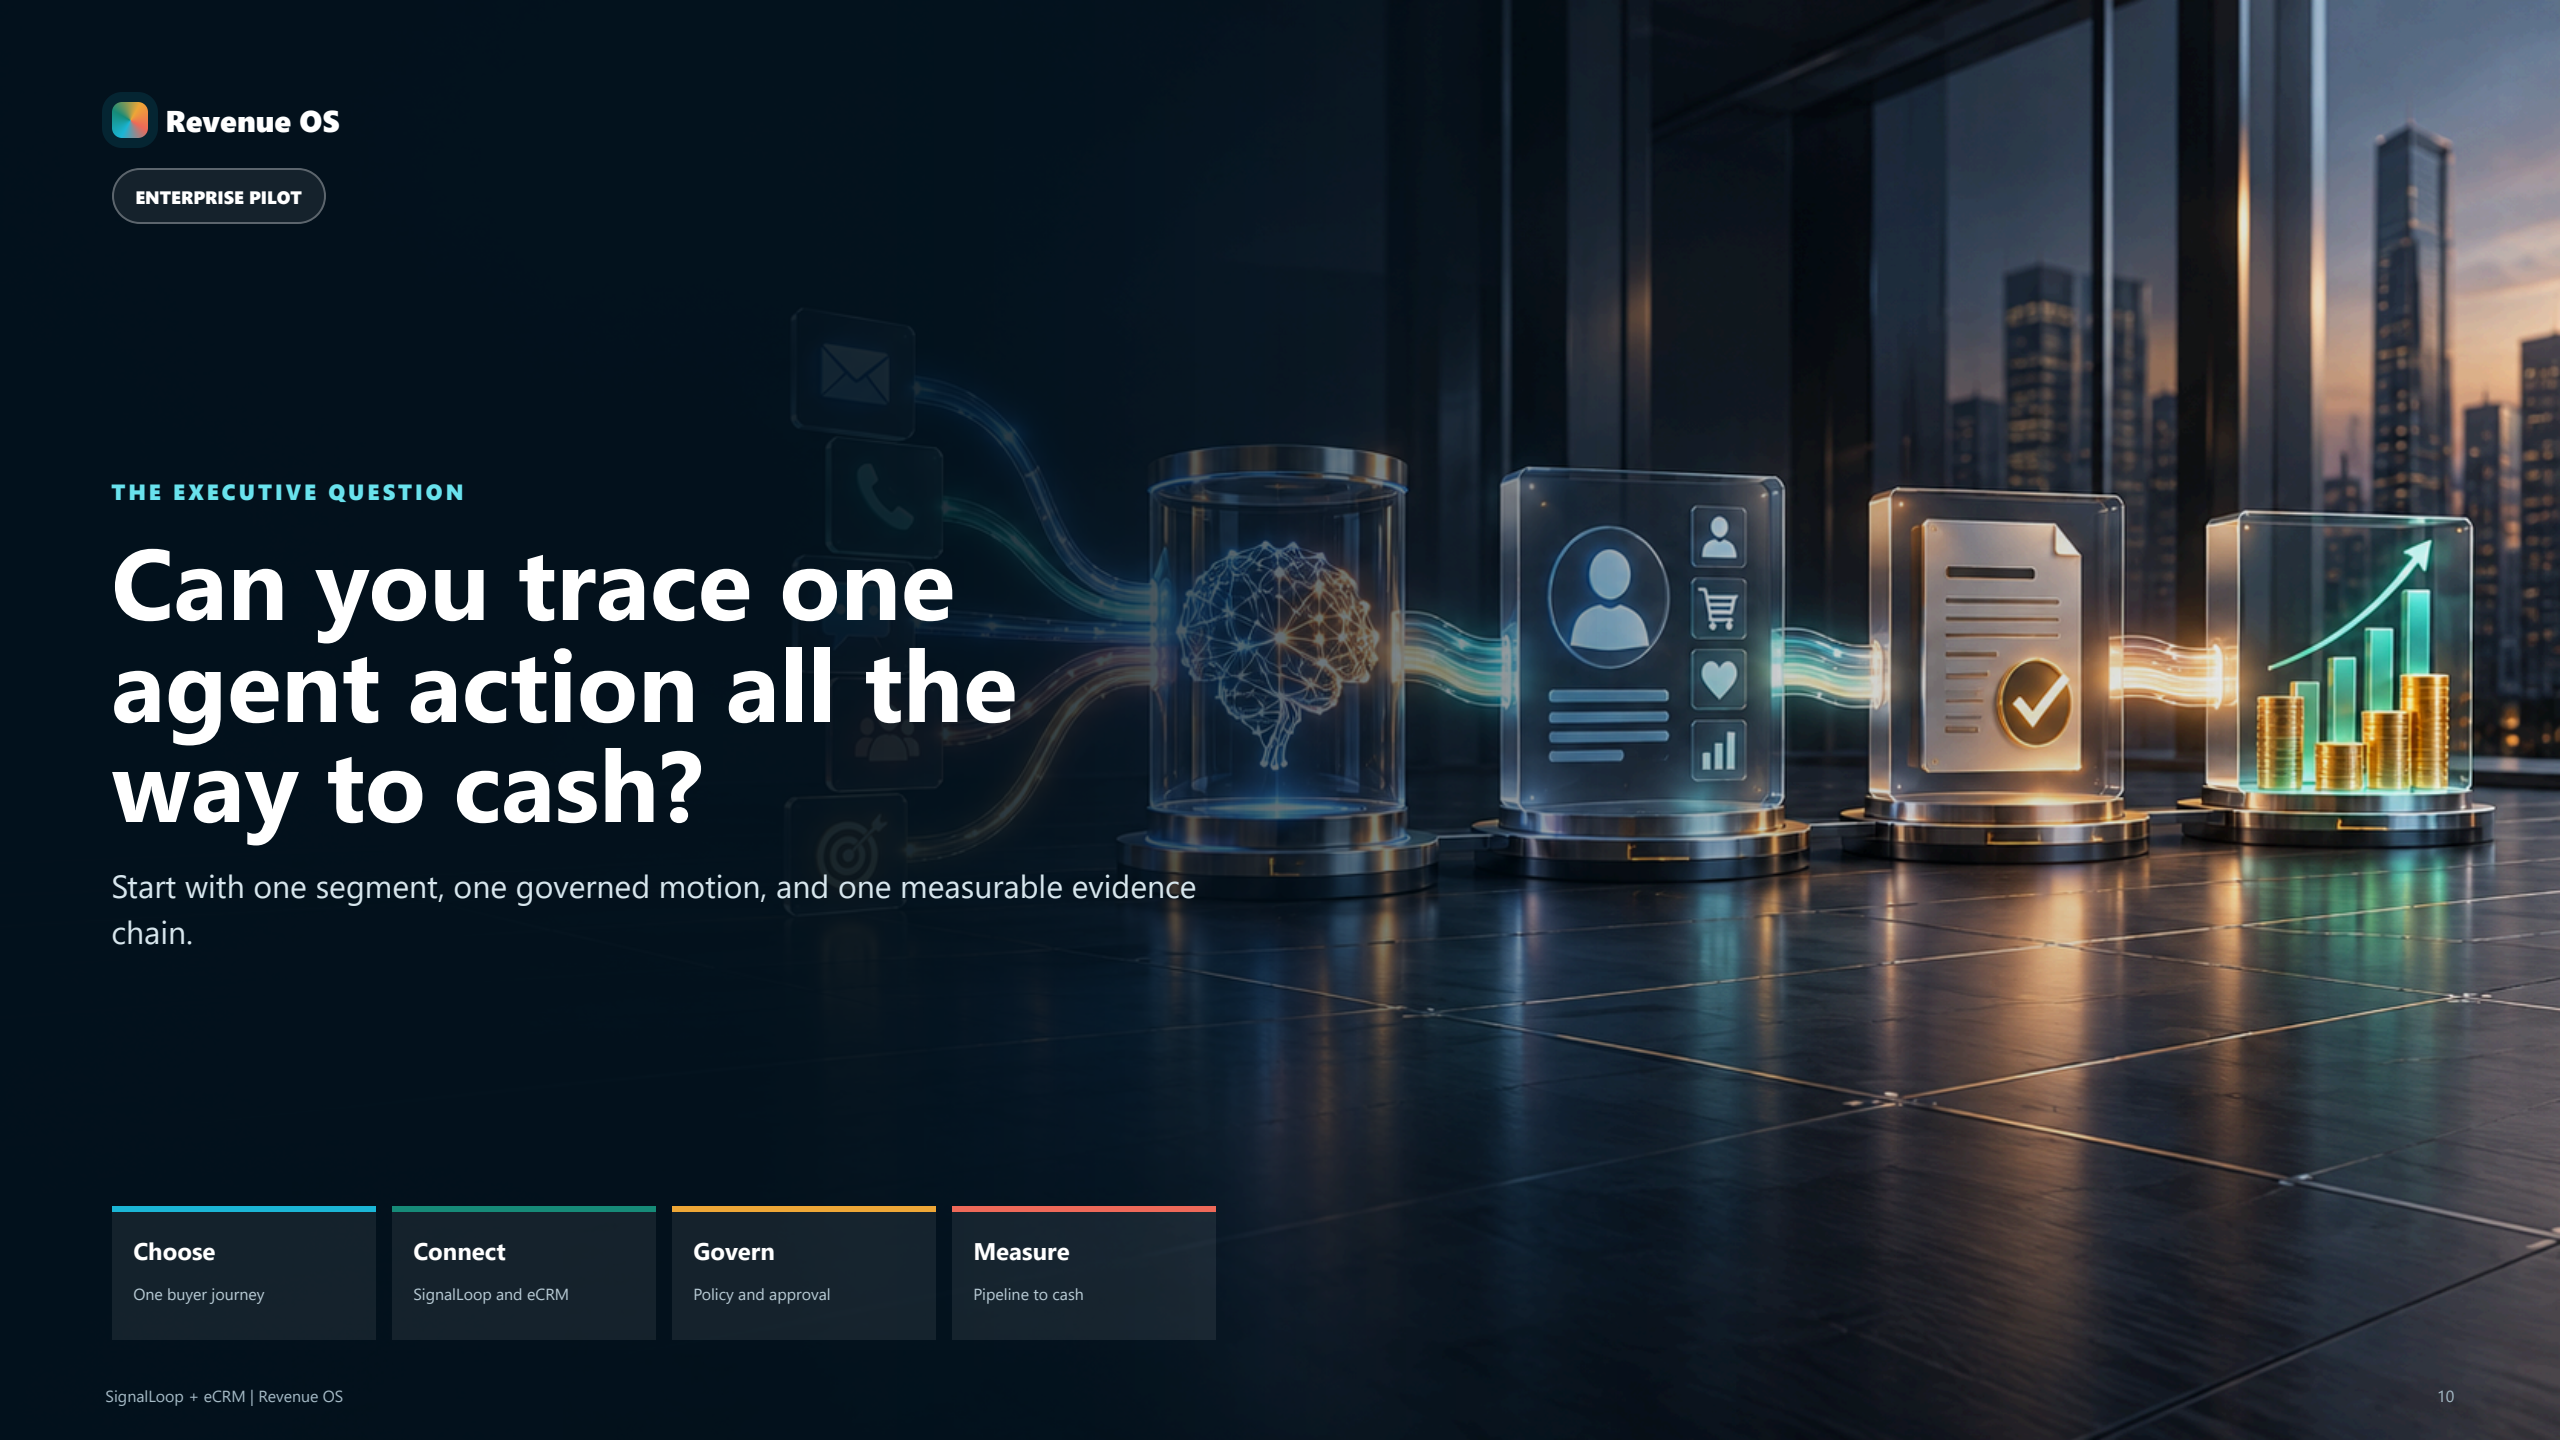

Govern high-impact action

Opaque automation →	Policy evidence
Point integrations →	Replayable events

Control that travels with the work.

Revenue OS

ENTERPRISE PILOT

THE EXECUTIVE QUESTION

Can you trace one agent action all the way to cash?

Start with one segment, one governed motion, and one measurable evidence chain.

Choose	Connect	Govern	Measure
One buyer journey	SignalLoop and eCRM	Policy and approval	Pipeline to cash
